

THE ALTERNATIVE INVESTMENT INDUSTRY BAROMETER

GLOBAL MACRO SIGNED ITS BEST MONTH SINCE FEBRUARY 2008

- The Lyxor Hedge Fund Index was up 0.9% in October, with 6 out of 10 Lyxor indices ending the month in positive territory.
- Global Macro managers signed a stellar performance, as their views on the US economy (long USD, short US equities and bonds) and their short Cable (GBP/USD) paid off. In a single month, the strategy erased year-to-date losses.

>> Fixed income markets faced some pressure in October as investors fret about less accommodative monetary conditions going forward. On the one hand, the Fed is increasingly likely to hike rates in December, while on the other hand, other central banks shifted to a less dovish stance. In that regard, 10-year bond yields rose by 23 bps in October in the US, supported also by buoyant economic data. In Europe, rumours of QE tapering pushed long-dated yields higher (+28 bps for the 10-year Bund). The rumours ended at the Oct 20 ECB meeting when President Draghi supported neither a program extension nor a tapering scenario. In the UK, 10-year Gilts soared (+50 bps) as the decline of the GBP revived inflation fears amidst "hard Brexit" angst. Expected divergence in monetary policies led the USD to appreciate against major currencies (+2.3% vs EUR, +3.4% vs JPY, +5.6 vs GBP). Global equities reflected currency swings. European equities outperformed US and EM markets. Finally, the unexpected jump in US crude oil stocks led oil prices to collapse at the end of the period. Brent oil prices closed the month at \$48/ bbl. As a result, European high yield credit outperformed US HY.

>> In that context, the Lyxor Hedge Fund Index enjoyed healthy returns fuelled by the stellar performance of the Global Macro and Fixed Income & Credit Arbitrage strategies. On the contrary, Long Term CTAs detracted from the overall performance due to their long positioning on fixed income.

>> Global Macro signed its best monthly return since February 2008. In a single month, the strategy erased year-to-date losses thanks to shorts on the GBP and the EUR vs USD and short positions on fixed income. The depreciation of the GBP led 10-year Gilts to surge, which was supportive for shorts on UK bond duration. Yet, dispersion in fund returns remained significant. For managers investing in equities, their preference for European and Japanese equities was a significant source of gains.

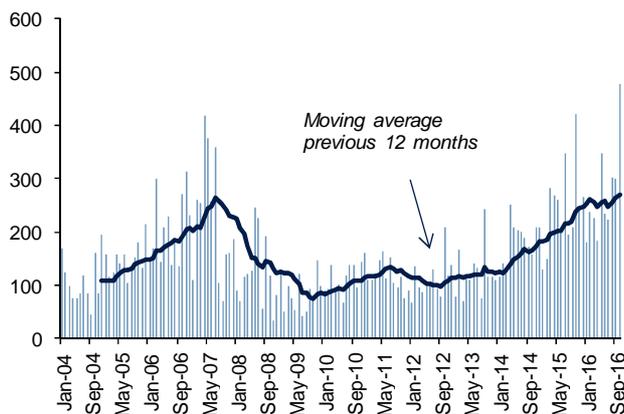

yields surged on the back of ECB tapering fears.

>> The L/S Equity strategy ended October in positive territory. However, fund returns were disparate across regions. In Asia, managers' preference for cyclical sectors helped them outperform their peers as value names performed strongly. In the US, managers adopted a cautious stance ahead of the US elections. They shaved off their market beta and increased their tilt toward defensive sectors. Long net exposure to Financials, Technology and Energy allowed them to generate strong alpha. On the flip side, European funds increased their positions on cyclical sectors, especially in Financials and Basic Materials.

"Going forward, we maintain our slight overweight stance on Event-Driven, with a preference for merger arbitrage players. We believe that the strategy can cope with higher bond yields as its net exposure to equities has decreased lately. Managers have thus ample room to deploy capital as opportunities arise. In that regard, Bloomberg data suggests that October was one of busiest months ever for global M&A activity. Announced M&A deals represented more than \$470bn (applies to deals with a transaction value above \$400m) with US M&A activity representing 60% of the total. The media sector was the most active thanks to deals such as the \$108bn proposed merger between AT&T and Time Warner. Yet, ahead of US elections most Event Driven managers have stayed cautious and will wait for greater political clarity before deploying their capital. The strategy is thus likely to be resilient if equity volatility continues to rise, which would lead to wider deal spreads and open the door for cash deployment."

Philippe Ferreira,
Senior Cross-Asset Strategist, Lyxor Asset Management

Frenzied M&A activity to support Merger Arbitrage managers
Global monthly M&A volume (USD bn)

Source: Bloomberg, Lyxor AM. As of end-October, 2016

>> Credit Arbitrage managers performed well, supported by the rally in high yield credit. Asian managers benefited from their positions on energy and banking names. Fixed Income players decently navigated the rising bond yield environment thanks to shorts on European bonds, as

>> After a strong rebound in September, Event Driven managers lost some ground. Special Situations managers suffered from the volatility spike at the end of the period. The healthcare sector was the main culprit with long investments in Allergan, Baxter and Shire as the main detractors. Additionally, Merger Arbitrage funds suffered from the widening in deal spreads (Syngenta/ ChemChina, St. Jude Medical/ Abbott Laboratories, RiteAid/ Walgreen). Ahead of the US elections, they remained cautiously exposed, waiting for greater political clarity before deploying their capital. They have reduced their net exposure to equities. The opportunity set for cash deployment remains large as M&A activity has reached all-time highs in October.

>> CTAs suffered a drawdown in October, as the positive correlation between equities and bonds weighed on Long Term models' returns. Their aggressive longs on German and UK bond duration were particularly detrimental. However, they shaved off their positioning over the month while short-term models turned neutral, allowing them to better navigate the rising yield environment. In aggregate, CTAs rebalanced their commodity portfolios extensively. In the FX bucket, models continued to strengthen their long USD allocation vs EUR and GBP especially. In that regard, currency trades remained the primary source of gains in October.

THE ALTERNATIVE INVESTMENT INDUSTRY BAROMETER

Below is a brief description of key hedge funds strategies:

Special Situations is a strategy that encompasses a combination of investment processes targeting equities or bonds whose valuation is altered by a special situation such as spin-offs, industry consolidations, liquidations, reorganizations, share buybacks and other extraordinary corporate transactions that generate investment opportunities.

Merger Arbitrage is a strategy that primarily consists of investing in equities involved in merger/acquisition operations and aims to take advantage of the spread between the price bid for the takeover and the price observed in the market.

Distressed Securities is a strategy that consists of investing in (or selling short) securities of companies for which the price has been, or is expected to be, affected by a distressed situation (e.g., pre- or post- bankruptcy).

Convertible Bonds and Volatility Arbitrage are strategies that aim to take advantage of volatility arbitrage opportunities by investing in various financial instruments. Convertible Bonds funds primarily invest in convertible bonds and discretionarily hedge some of the underlying risk factors (interest rate risk, credit risk, market risk) in order to gain exposure to volatility and/or credit risk at a very attractive price.

Fixed Income Arbitrage is a strategy that aims to take advantage of pricing anomalies between fixed income securities, sectors, markets and yield curves.

L/S Credit Arbitrage strategy is a directional strategy that involves buying bonds and credit and fixed income derivative instruments that are expected to appreciate and selling the ones that are expected to depreciate.

Global Macro is a strategy that aims to take advantage of expected macroeconomic trends and may invest in all types of markets and instruments.

CTAs Long Term is a strategy that aims to capture price movements in fixed income, equity, currency and commodity markets with the use of systematic trading models.

CTAs Short Term is a strategy that aims to capture short term price movements in fixed income, equity, currency and commodity market with the use of systematic trading models.

L/S Equity Variable Bias is a directional strategy that primarily involves buying equities and equity derivatives that are expected to appreciate and selling those that are expected to depreciate. The portfolio's net exposure to the market (possibly net long, net short or market neutral) will be actively managed depending on the manager's expectations.

L/S Equity Long Bias is a directional strategy that primarily involves buying equities and equity derivatives that are expected to appreciate and selling those that are expected to depreciate, while structurally maintaining a net long exposure to the equity market.

L/S Equity Market Neutral is a strategy that primarily involves buying equities and equity derivatives that are expected to appreciate and selling those that are expected to depreciate while generally neutralizing broad equity market risks.

L/S Equity Statistical Arbitrage is a strategy that primarily consists of investing in some equities and selling short other equities. The security selection approach is typically based on quantitative analysis of either fundamentals, prices, or a combination of the two. This strategy typically seeks to offer limited exposure to equity market risks.

Lyxor Credit Strategies Index aims to measure the performance of hedge funds following any type of credit and fixed income related strategies: take advantage of pricing anomalies between fixed income securities, sector, market and yield curves, buying bonds or credit or fixed income derivative instruments that are expected to appreciate and selling the ones that are expected to depreciate.

Each index is reviewed and rebalanced on a monthly basis in line with investment guidelines, the evolution of assets under management and the liquidity constraints. Owned by Société Générale Index, the indices are calculated and published on a daily basis by Standard and Poors on Bloomberg and Reuters.

Important Information

This material has been provided to you on a strictly confidential basis, has been prepared solely for informational purposes and does not constitute an offer, or a solicitation of an offer, to buy or sell any security or financial instrument, or to participate in any investment strategy. This material does not purport to summarize or contain all of the provisions that would be set forth in any offering memorandum. Any purchase or sale of any securities may be made only pursuant to a final offering memorandum. There is no assurance that a transaction will be entered into on any indicative terms.

The information contained in this material should not be construed as a recommendation or solicitation to buy or sell any security or financial instrument, or to participate in any investment strategy. It does not have regard to specific investment objectives, financial situations, or the particular needs of any specific entity or person. Investors should make their own appraisal of the risks and should seek their own financial, legal and tax advice regarding the appropriateness of investing in any securities or financial instrument or participating in any investment strategy.

Potential investors should be aware that any direct or indirect investment in any investment vehicle described herein is subject to significant risks, including total loss of capital, such investments may be highly volatile, and there are significant restrictions on transferability and redemption of an interest in such investment vehicle. Liquidity of an investment described herein is not guaranteed and there are circumstances under which such liquidity may be restricted or may not be possible. Investors should be able to bear the financial risks and limited liquidity of this investment. Alternative investments are suitable only for sophisticated investors who are able to sustain a loss of their entire investment. No assurance can be given that the investment objectives of the investment vehicles presented herein will be achieved or that an investor will not lose all or substantially all of his or her investment. Hedge fund investment managers may use investment strategies and financial instruments that, while affording the opportunity to generate positive returns, also provide the opportunity for increased volatility and significant risk of loss. The investments described herein are also subject to the risk of counterparty or issuer default. This brief statement does not disclose all the risks and other significant aspects in connection with transactions of the type described in the materials. Potential investors should refer to the relevant offering document which includes important information, including related risk factors.

The Assets Under Management presented herein reflect total assets in all investment vehicles and accounts ("Lyxor Funds") for which Lyxor provides continuous and regular supervisory or management services for a fee (i.e. administrative, management and/or performance fees as well as other fee sharing arrangements, as applicable), including amounts from certain Lyxor Funds that invest into other Lyxor Funds.

Historical data relating to the assets described herein is provided for information only. All performance information set forth herein is based on historical data and, in some cases, hypothetical data, and may reflect certain assumptions with respect to fees, expenses, taxes, capital charges, allocations and other factors that affect the computation of the returns. An individual investor may have experienced different results for the period in question had it been an investor during such period. These figures may also be unaudited and subject to material change. Past performance is not indicative of future results, and it is impossible to predict whether the value of any fund or index will rise or fall over time.

Under normal market conditions, Lyxor intends to offer weekly or monthly liquidity for its managed accounts. However, weekly or monthly liquidity is not guaranteed and there are circumstances under which such liquidity may not be possible, including, but not limited to: 1. Periods during which there are a large number of redemption requests, or where there are one or more large redemption requests; 2. Where Lyxor's risk management guidelines would prohibit additional liquidity (for example, in the case of managed accounts that are heavily leveraged); 3. Where the underlying investments of a managed account impose additional restrictions on liquidity (for example, the use of "gates").

While the information (including any historical or hypothetical returns) in this material has been obtained from sources deemed reliable, neither Société Générale ("SG"), Lyxor Asset Management, S.A. ("Lyxor AM"), nor their affiliates guarantees its accuracy, timeliness or completeness. To the extent that this document provides information relating to a Trading Advisor and/or a Benchmark Fund (if and as named herein), all information about such Benchmark Fund and Trading Advisor contained in this report (including historical or hypothetical returns) was provided by the Trading Advisor. Such Trading Advisor is not affiliated with SG or Lyxor AM, and none of SG, Lyxor AM or any of their affiliates guarantees the accuracy, timeliness or completeness of such information. None of SG, Lyxor AM or any of their affiliates has checked the accuracy of any data herein provided by such Trading Advisor or the sources thereof nor the methods or underlying data used to prepare this information. Neither SG, Lyxor AM nor any of their affiliates is under any obligation to update, modify or amend this communication or otherwise notify you that any matter contained herein has changed or subsequently become inaccurate. Any opinions expressed herein are statements of our judgment on this date and are subject to change without notice.
